Projects

Loan Performance Analytics Dashboard

Power BI, SQL, DAX, Excel

- Designed an executive Power BI dashboard to monitor loan disbursement, recovery, default rate, and branch performance using interactive KPIs and drill-through reports.
- Identified a critical 53% recovery gap and discovered that the Online channel contributed 36% of successful recoveries, enabling data-driven business recommendations.
- Developed DAX measures, Power Query transformations, and dynamic visualizations to automate reporting and support management decision-making.

Retail Sales Analytics Dashboard

Power BI, SQL, Excel

- Built an end-to-end sales dashboard analyzing revenue, profit, customer segments, regional performance, and monthly sales trends from transactional retail data.
- Performed data cleaning, transformation, and data modeling using Power Query and SQL to improve reporting accuracy and consistency.
- Designed interactive filters, KPI cards, trend analysis, and drill-down reports that enabled stakeholders to identify top-performing products and sales opportunities.
